Introduction

Company established in 2007 to produce Pmma Acrylic and Solid Surface products. It provides solutions in commercial, marketing, design, and construction sectors in Turkey since the beginning. The company also chased the involvements in global phase and created the pmma acrylic and solid surface brands which is called 'MARYFASS' - 'AKRILINE' - 'POLAKRIL' and 'sirdus' to fulfill the need for solid surface material in bathroom, kitchen, and luxury interior design markets. Maryfass produces acrylic products now in 3 factory with 4 brands for international market and exports its products for decades. The main factory placed in Kocaeli city, two other factories placed in Mersin and Istanbul, Our 3 factories cover an area of 28000 Square meters where 220 hard working personnel are producing 1.300 tons of pmma acrylic and solid surface sheets, sinks, washbasins, freestanding bathtubs and shower trays per month.

Hard working , Made in Turkey”

Since the beginning, the company became the most developed and the leader Turkish supplier in acrylic sheet market. Maryfass satisfied the customer's needs with its renowned brand 'MARYFASS' for Sheets, Bathtubs, Shower trays and 'AKRILINE' for Sinks, Washbasins and 'sirdus' for Pmma Acrylic and ABS sanitary products. also 'POLAKRIL' for internal market modified and pure acrylic sheets.

Our latest technologies bring our customers enormous advantages in energy consumption and price. Environmental standards are very important for us. our main export market is Europe , North af rica , Middle east and neighbour countries.

The Company has continuously increased both its production capacity and product quality and has become one of the leading producers on a global scale. In Production Facility, Maryfass produces:

- 750 tons of Pmma Acrylic and ABS
- 550 tons of Solid Surface Products
- With 20 different sizes and in more than 500 different models and color...

MARYFASS

Innovative MARYFASS, 100% acrylic solid surfaces, provides high-performance material in superior standards. The homogenous structure of sheets allows easy restoration and high level of hygiene. The solid micro level structure of sheets inhibits the growth of bacteria or fungi. As a result, MARYFASS sheets are not only preferred in the kitchen but also in restaurants, hospitals, laboratories, and schools.

Maryfass Acrylic Group is the leading producer of the solid surface acrylic sheet in Turkey with its capacity of 250 tons of production per month.

Factories:

Istanbul : Arnavutkoy, No60A, İstanbul, TURKEY

Global Market

The original solid surface established in the late 60s is made by DuPont and is called Corian, after which most companies started to produce acrylic and polyester.

Maryfass also started producing Acrylic sheets from 2007 besides our modified solid surface products. We have more than 120 colors and types and also can produce any models as requested by the customer in different thicknesses also similar to any models from Lotte, Corian, Hi-macs and etc.

Our Factory are produced with different sizes as below:

- Standard sizes: 65x310, 65x368, 76x250, 76x368
- Other sizes: 76x400, 80x215, 80x270, 80x310, 80x368, 85x275, 100x255, 100x310 (All dimensions are in cm)

Thicknesses available from 4mm until 30mm, width until 120 cm and length until 400 cm.

The applications area of our products is very wide and main consumption channels in global market are as below:

- Acrylic and solid surface fabricators
- Advertising and event agencies
- Public utility companies
- Architects and designers, construction companies
- Banks, hotel receptions, etc.

Factories:

AKRILINE sinks and washbasins

Acrylic solid surface sink and basin made from acrylic, ATH, and polyester resins and its call modified acrylic, stone resin or artificial stone usually in the market.

Acrylic sinks are relatively inexpensive compared with alternatives. They are available in a number of different colours and styles and can be jointed and sanded virtually seamlessly to an acrylic and some other worktop materials.

Advantages of Acrylic Solid Surface:

- they do not readily transfer heat, reducing the time it takes for dishwater to cool. The surface of acrylic sinks do not chip as a rule. They can be easily repaired. The material is relatively good at absorbing shock, so there is less chance of damaging your dishware.
- Products made of acrylic are very light in weight.
- smooth and non-porous surface (antibacterial), color resistant, heat resistant.
- DIN connectors, central drain with cover without overflow, suitable for all taps.

Factories:

Istanbul : Arnavutkoy, No60A, Istanbul, TURKEY

Mersin : No:60/A Akdeniz, Mersin, TURKEY

Kocaeli : Cumhuriyet, No:3 Kocaeli, TURKEY
